SUMMARY

Software Developer with strong foundations in Java, Python, JavaScript, and system design. Experienced in building AI-powered applications, automation systems, and full-stack solutions. Contributed to open-source projects including Web Platform Tests (WPT), the standards suite used by Google, Mozilla, and Apple. Passionate about solving complex technical problems and developing scalable, high-quality software.

SKILLS

Programming Languages: Java, Python, JavaScript, HTML, CSS

Databases: MySQL, MongoDB

Frameworks & Libraries: React, Pandas

Developer Tools: Git, GitHub, Bugzilla

Areas of Interest: Artificial Intelligence (AI), Machine Learning (ML), System Architecture, Data Structures & Algorithms (DSA), Data Preprocessing

PROJECTS

StudentHolic AI – AI-Powered Content Creation Platform

Apr 2024

github.com/deepith-18/StudentHolic-AI | Google Hackathon Project

- Built an AI platform that generates short videos from text prompts by coordinating media rendering and script generation workflows.
- Integrated a PDF-to-script converter to parse study materials into structured, video-ready content using asynchronous processing.
- Deployed a Telegram bot for instant media delivery, enabling cross-platform access to generated content.
- Designed a modular architecture using webhook endpoints to allow future integrations with platforms like WhatsApp.

Courier Management System

Sep 2024

github.com/deepith-18/Courier-Management-System

- Built a desktop logistics application in Python to track parcel dispatch and transit status in real time.
- Designed a GUI using Tkinter with separate workflows for customer and administrator modules.
- Structured a relational database using SQLite/MySQL to manage parcel records, transaction history, and tracking queries.

Academor – AI for Warehouse Optimization

Jun 2023 – Jul 2023

github.com/deepith-18/AI-for-Warehouse-Optimization

- Built an inventory prediction model using Python and Pandas to forecast stock levels from historical warehouse data.
- Developed data visualization dashboards to display warehouse metrics and support operational decision-making.

OPEN SOURCE CONTRIBUTION

- Authored and merged multiple conformance tests for HTML & CSS into the Web Platform Tests (WPT) project, the official standards suite used by Google, Mozilla, and Apple.
- Identified and submitted a detailed bug report for a CSS Flexbox rendering issue in Mozilla Firefox, providing a reproducible test case to core engineers on Bugzilla (Bug 1986522).
- Collaborated directly with senior maintainers on GitHub (WPT, Pandas), resolving CI/CD failures and using advanced Git workflows including `git rebase`.

EDUCATION

ACS College Of Engineering, Bengaluru

Dec 2022 – Jun 2026

B.Tech in Computer Science and Engineering | CGPA: 9.31 / 10.0

Jawahar Navodaya Vidyalaya

Sep 2020 – Aug 2022

Pre-University Course (PUC) | Percentage: 83.2%

CERTIFICATES & AWARDS

Participant, Google Hackathon, focusing on collaborative development and competitive problem-solving.

Career Essentials in Generative AI (LinkedIn Learning) • **Core Java** (Coursera) • **Computer Networks** (NPTEL) • **Database Management** (Infosys Springboard)
